

Passenger Turnover

Key trends:

- ▶ Long-distance railway transportation remains competitive at distances up to 1.5 th. km. At the same time over 70% of all passengers choose railway services for distances up to 700 km.
- ▶ The number of railway passengers has been growing for the third consecutive year and exceeded a significant milestone in 2012: 1 billion people
- ▶ Passenger turnover within "Russian Railways" network is growing in both long-distance traffic and suburban traffic
- ▶ The declining trend in the railroad transport share of total passenger traffic remains unchanged (-9.2 p.p. in the last 12 years)
- ▶ Work with the constituents of the Russian Federation, aimed to compensate the shortfall in income connected with suburban traffic, is continuing

Passenger turnover by railroad transport in 2012 in Russia

144.6

bln passenger-kilometers

+3.4% compared with 2011

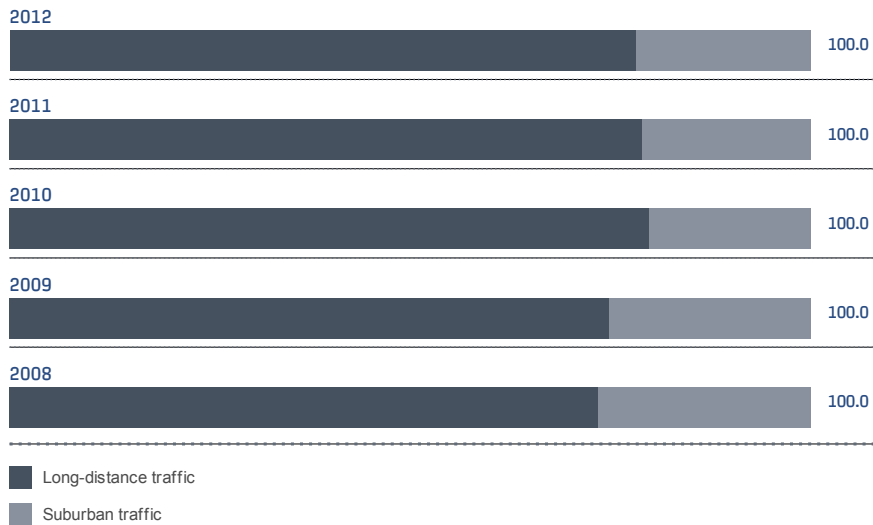

Number of passengers transported by railroad in 2012 in Russia

1,058.8

mln passengers

+6.6% compared with 2011

PASSENGER TURNOVER WITHIN RAILROAD TRANSPORT, BILLIONS PASSENGER-KILOMETERS
